

Cesar Martinez, Frontend Developer

Barquisimeto - Lara, 3001, Venezuela, 04245544886, cmmh.developer@gmail.com

PROFILE

I'm a kind, patient, and critical thinker. These qualities have allowed me to deeply understand client needs, offer constructive solutions, and consistently improve outcomes—fostering respectful and effective collaboration. I enjoy working on challenging projects that require adaptability and a growth mindset. I'm quick to embrace new technologies and draw on solid foundations in frontend development to build solutions that balance usability, performance, and design.

EMPLOYMENT HISTORY

Nov 2024 - May 2025	Junior Frontend Developer, Estela Estudio Digital	Remote / Barquisimeto
<ul style="list-style-type: none">Developed custom websites using Next.js and Tailwind CSS, achieving responsive, accessible, and fast-loading interfaces.Built reusable UI components from Figma mockups, emphasizing scalability, semantic code, and a clean design system.Implemented Jamstack architecture to create SEO-optimized sites with improved loading times (reducing TTI by up to 40%).Worked in Agile sprints with GitHub, Trello, and asynchronous standups; maintained excellent coordination across time zones.Helped clients increase site traffic and retention through UX enhancements backed by analytics.		
May - Jul 2024	Fullstack Developer, Grupo Tendencias C.A	Barquisimeto
<ul style="list-style-type: none">Developed and maintained responsive web applications using modern JavaScript frameworks.Collaborated with cross-functional teams to design user-friendly interfaces and optimize user experience.Implemented RESTful APIs to enhance application functionality and performance.Conducted code reviews and provided mentorship to junior developers.Utilized version control systems to manage codebase and facilitate team collaboration.		

EDUCATION

Jan 2022 - Dec 2024	Associate Degree in Computer Science (TSU en Informática) Instituto Universitario Jesús Obrero (IUJO)	Barquisimeto
<p>Completed a 2-year technical program focused on fullstack web development, mastering tools such as JavaScript, React, Node.js, and SQL. Gained practical experience building real-world projects, including ERP systems and e-commerce platforms.</p> <p>Actively participated in extracurricular activities and technical events — notably won a hackathon organized by the Barquisimeto City Advisory Council, where I collaborated with a multidisciplinary team to build a prototype system for medicine distribution using Angular, Node.js, and PostgreSQL. This experience helped strengthen my leadership, creativity, and problem-solving skills, while also expanding my professional network and enhancing my ability to work as part of a team in high-pressure environments.</p>		
Jun 2016 - Jun 2019	English Language Course Fundación Universidad de Carabobo (FundaUC)	Barquisimeto
<p>Completed a 3-year English course (2016-2019), achieving an intermediate level of proficiency. Developed strong listening, reading, and writing skills, enabling the use of technical documentation and tools in English. Strengthened communication abilities in multicultural environments.</p>
