César Martínez

Full Stack Product Engineer · Co-Founder & CTO @Tripealo

Barquisimeto, Venezuela | +58 424-5544886 | cmmh.developer@gmail.com | linkedin.com/in/cesarmartinez-dev | github.com/CisorM

PROFILE

Full Stack Product Engineer with 2+ years of professional experience building web and mobile products end to end and making product and architecture decisions. Co-founder and CTO of Tripealo, which I built from the first line of code to production, and responsible for digitizing my family's business. I have led development teams across backend and frontend; what defines me most is solving problems as a team. I work with AI agents (Claude Code, subagents, MCP) to build faster without sacrificing quality.

EXPERIENCE

Co-Founder & CTO · Tripealo

May 2026 – Present

Local tourism marketplace in Venezuela · Barquisimeto · tripealo.app

- I lead product, architecture and infrastructure; I built the **web marketplace (Next.js)** and the **mobile app (React Native + Expo)**.
- Implemented **payments adapted to Venezuela** (pago móvil, bank transfer, Zelle, Binance, cash) with receipt upload and verification, coupons, exchange rates and savings goals for trips.
- Built the **booking** flow (departures by state, date and category, deposit-based booking, shareable trip sheet) and the **private trips** flow (custom requests, price estimator, PDF quotes and payment plans).
- Developed **agency** and **admin** dashboards with role-based access control, and automated WhatsApp and email notifications.

Owner · Doctor Pantalla

May 2022 – Present

Electronics store with two locations · Lara, Venezuela

- Digitized operations at both locations with an in-house system: inventory, sales, repairs, orders, Cashea financing and reports, with separate access for management and staff.
- With those tools I delegated day-to-day operations to the staff; I oversee the business through reports, without depending on my presence.

Fullstack Developer · Kiwi Company

Aug 2025 – Oct 2026

Digital agency · Remote

- Built a platform that integrates logistics and finance for a transportation client, designed to serve multiple companies from a single installation.
- Proposed and implemented AI document intake, eliminating manual transcription of receipts; React architectures (Next.js and Vite) deployed on AWS and Supabase, in two-week sprints with GitHub (branching, releases, CI).

Frontend Developer · Estela Estudio Digital

Nov 2024 – May 2025

Digital agency · Remote (Chile)

- Built custom websites with Next.js and Tailwind CSS, responsive, accessible and SEO-optimized, with reusable components based on Figma designs.
- Implemented a Jamstack architecture that reduced TTI by up to 40%, working with a team in another time zone.

Fullstack Intern · Comercializadora e Importadora AB

May 2024 – Jul 2024

Barquisimeto · Hybrid

- Built the MVP of an HR system, gathering requirements directly with the team.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Astro, Angular · **Mobile:** React Native, Expo

Backend & data: Node.js, Express, Supabase, PostgreSQL, SQL, REST APIs, GraphQL · **Infra:** Vercel, AWS, GitHub, CI/CD
